

IQSTACK
TECHNOLOGIES

COMPANY PROFILE

2026 EDITION

Intelligent technology, engineered to scale.

Hello, welcome to

IQStack Technologies Limited

your partner in software, security, fintech and digital infrastructure.

We help organisations across Africa design, build, secure and run the technology their operations depend on, with one accountable team from idea to production and beyond.

Thank you for considering us.

We look forward to building with you.

ABOUT OUR COMPANY

IQSTACK TECHNOLOGIES LIMITED is a 100% Tanzanian owned technology company headquartered in Dar es Salaam.

We bring software engineering, cyber security, artificial intelligence, fintech, cloud and ICT infrastructure under one roof, serving banks, fintechs, government institutions, NGOs and fast-growing businesses across East & Central Africa.

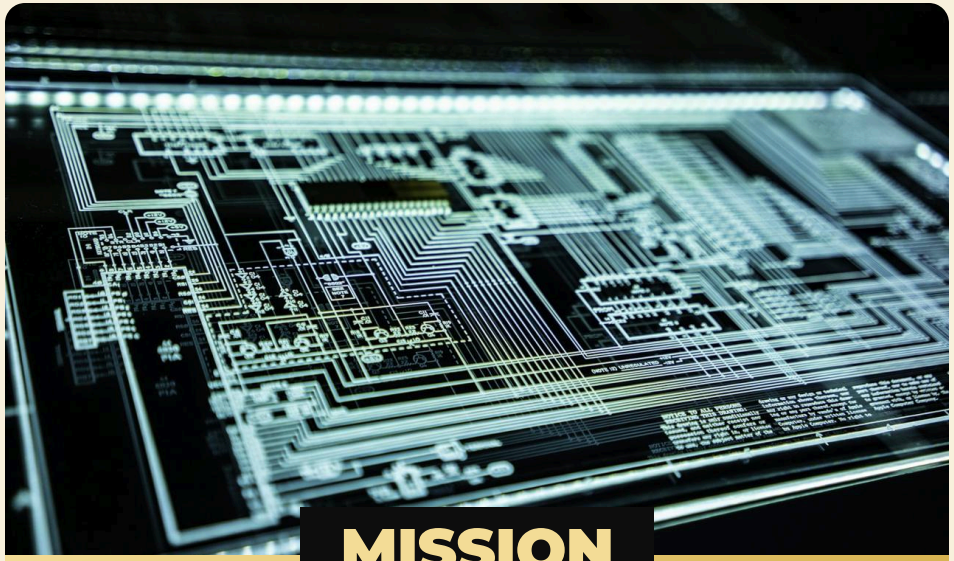

Our purpose is simple: technology done properly. Secure by design, built to scale, and supported for the long run.

VISION

To be the most trusted technology partner in East Africa, known for engineering excellence and integrity.

MISSION

To engineer secure, intelligent and dependable technology that helps African organisations compete and grow.

OUR CORE VALUES

ENGINEERING EXCELLENCE

We sweat the details that others skip: architecture, testing, documentation and performance.

SECURITY BY DESIGN

Every system we ship is threat-modelled, hardened and audited before it reaches production.

INTEGRITY

Honest estimates, transparent progress and clear ownership of outcomes.

PARTNERSHIP

We stay on after launch, supporting, improving and growing with our clients.

OUR SERVICES

17 disciplines.
One accountable team.

www.iqstacktech.com

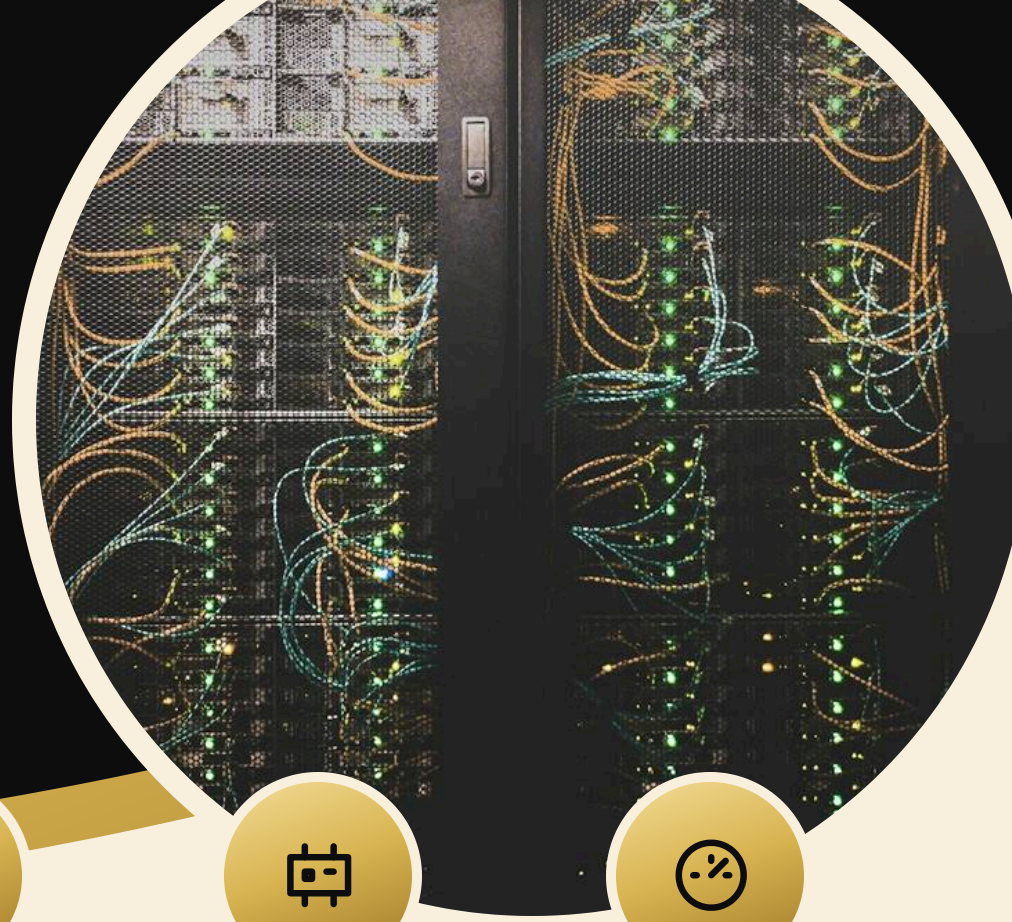

SOFTWARE & DIGITAL

Products and platforms your customers and teams use every day, designed, built and launched by one team:

- Custom software & enterprise systems
- Mobile (Android & iOS) and web applications
- Artificial intelligence, data analytics & automation
- Systems integration & ICT consultancy
- Branding, digital marketing, content & SEO
- E-commerce platforms & online marketplaces
- Genuine software licensing & digital products

INFRASTRUCTURE & ENGINEERING

We design, supply, install and maintain the physical layer that keeps systems running, from data centre to device in the field:

- **ICT infrastructure & data centres**
- **Networking & connectivity**
- **ICT equipment & hardware**
- **IoT & smart solutions**
- **Electronics & device engineering**
- **Instrumentation & calibration**

CYBER SECURITY, AUDIT & CLOUD

We protect the systems and data that organisations cannot afford to lose, and keep them online around the clock.

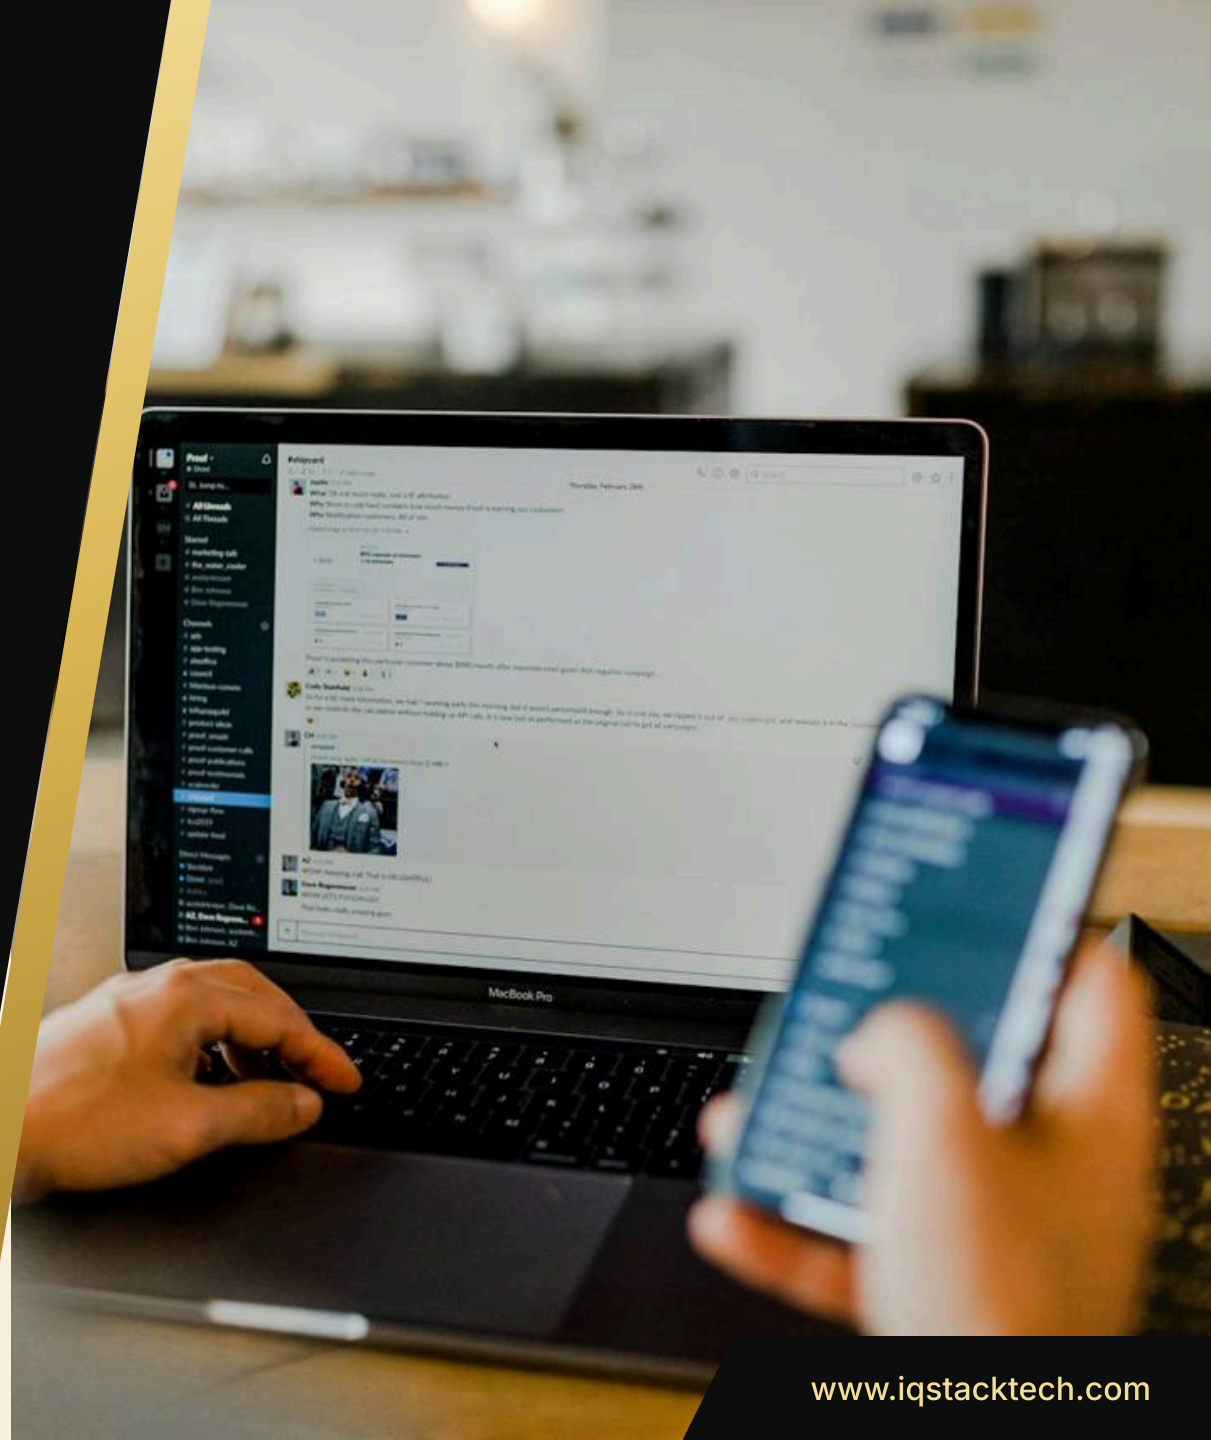

- Penetration testing & vulnerability assessment
- 24/7 security monitoring & incident response
- System & information security audit and compliance
- Cloud hosting, backups & managed services
- 99.9% uptime target on managed hosting

FINTECH & DIGITAL MONEY

Payments infrastructure we build for clients, and digital financial services we operate end to end:

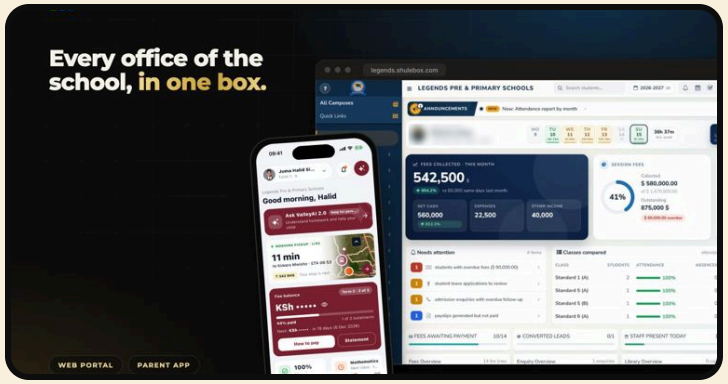

- Payment gateways, mobile money & card integrations
- Wallets, lending & digital banking platforms
- E-money, merchant & agent networks*
- Settlement, reconciliation & compliance reporting
- Live today: Grupo Payment Gateway & Groop Loan

* Subject to any licence or approval required from the Bank of Tanzania.

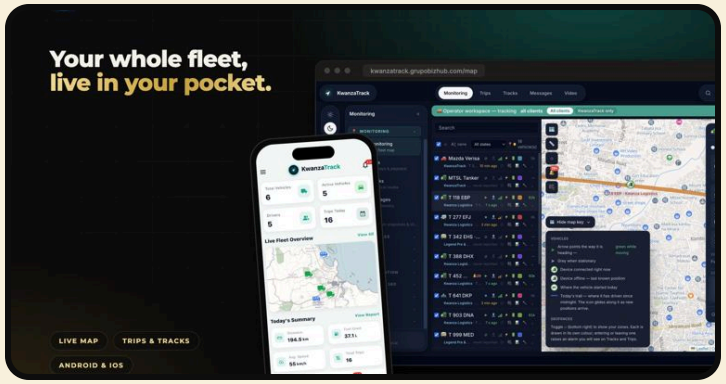

PROVEN IN PRODUCTION

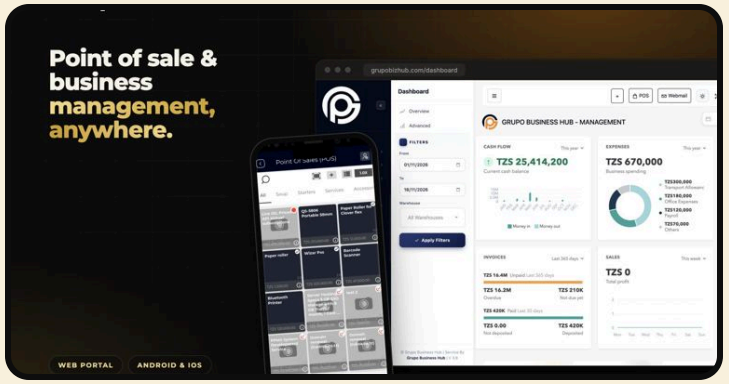

13 platforms built and running for clients and partners, including:

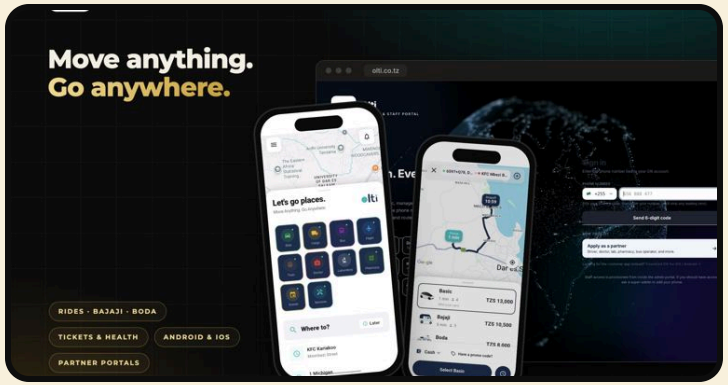

ShuleBox · Every office of the school, in one box.

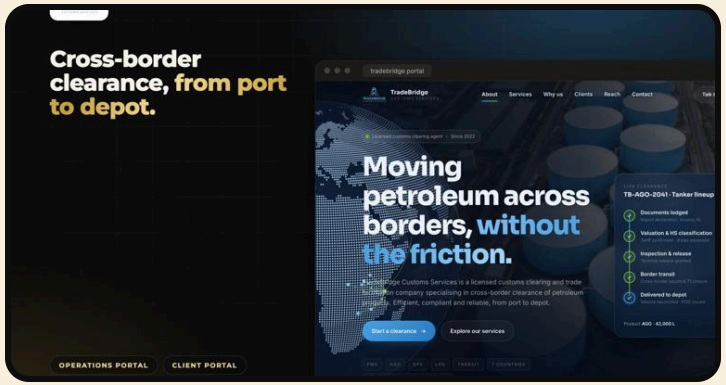

KwanzaTrack · Your whole fleet, live in your pocket.

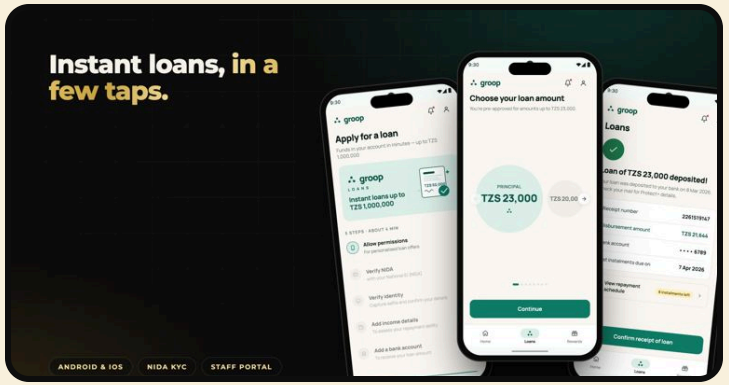

Grupo SaaS POS · Point of sale & business management, anywhere.

Olti · Move anything. Go anywhere.

TradeBridge System · Cross-border petroleum clearance, from port to depot.

Groop Loan · Instant loans, in a few taps.

Why choose IQStack?

01 **One accountable team**
Strategy, engineering, security and support under one roof.

02 **Security by design**
Every system threat-modelled, tested and hardened before go-live.

03 **Proven in production**
13 live platforms across fintech, mobility, energy and more.

04 **Built for African realities**
Mobile money, low bandwidth, local tax and regulation, built in.

05 **Support after launch**
SLAs, monitoring and 24/7 response, not just a handover.

06 **You own what we build**
Source code, documentation and IP transfer to you on payment.

OUR TEAM

At **IQSTACK TECHNOLOGIES**, our strength is our people: software engineers, security specialists, data scientists, network and infrastructure engineers, designers and project managers.

We work in small senior squads with demos every two weeks, so clients always know what is being built, by whom, and when it will ship.

TRADEBRIDGE CUSTOMS SERVICES

We are proud to power the operations of our clients, and to grow with them.

LET'S GROW TOGETHER

We are actively looking for partners, investors and founders to take our products and ideas further, in Tanzania and across the region.

01

Partner with us

Co-deliver client projects, resell or distribute our products, integrate your technology, or operate one of our platforms in your market.

02

Invest

Back IQStack or a product we build and operate: mobility, fintech, fleet tracking, retail, education and more.

03

Build an idea together

Bring the idea, the market insight or the problem. We bring product, engineering and the launch team.
